

**KDC+™ FLAT-PACK METAL GARDEN
MOTORBIKE STORAGE CONTAINER**

CONTAIN YOUR EXCITEMENT

Benefitting from Knock Down Construction (KDC™), this robust storage unit has been purpose-built for motorbike storage. Built from galvanised steel, it comes with a 10-year corrosion guarantee and complies with the latest UK COSHH regulations, thanks to a leak-proof bunded steel base and integrated ventilation. It has been manufactured from 0.8mm galvanised steel, making it corrosion-resistant, and is fitted with a heavy-duty OSB sheet for enhanced durability.

For added security, the doors are fitted with twin locks approved by the UK Locksmiths Association that are both anti-pick and anti-snap, reducing insurance premiums.
