

KDC™ IBC STORE+ DOUBLE SMKDCIBC2+

THE LEADING FLAT-PACKED, ALL-STEEL, PORTABLE IBC STORE. DESIGNED TO STORE IBC CONTAINERS SAFELY, WHILST COMPLYING TO CHEMICAL STORAGE SAFETY REGULATIONS ON SITE.

Benefitting from a modular design and fully galvanised steel construction for supreme durability, this robust storage unit provides you with a safe and secure solution for keeping chemicals and other hazardous goods on your premises.

Delivered flat-packed, the completely stackable design can be built and disassembled with ease, keeping costs to a minimum during shipping or when being transferred between sites. It also offers excellent ventilation, and comes with door clips that allow entry without risking damage to the unit during windy conditions.

MAXIMISE CAPACITY MINIMISE COSTS

SPECIFICATION

- Fully galvanised steel construction
- Delivered flat-packed
- Modular design
- Completely stackable to minimise shipping costs
- Erected in under 45 mins with 2 persons
- Large forklift pockets (194 x 70mm) make transportation easy – either flat-packed or built
- 1120-litre sump capacity
- Ventilation for storage of chemicals
- Heavy-duty galvanised door hinges
- Designed to fit the maximum number of units into a shipping container

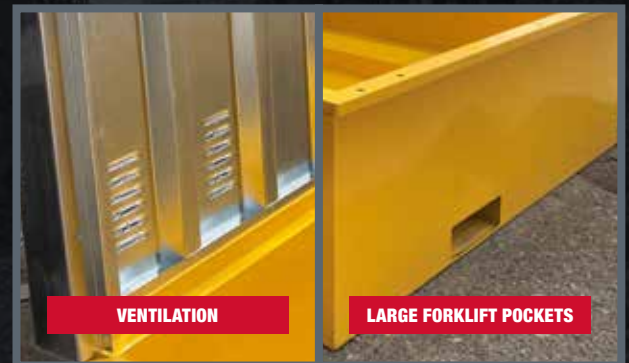

KEY FEATURES

- Double-opening doors to reduce wind damage and overall footprint
- Doors can be held open using a door clip on the side of the unit, allowing the door to be accessed in windy conditions
- T-lock door handle can be used in conjunction with the users' own padlock or combination padlock, enabling multiple users to access the unit without the use of keys
- Can be disassembled and transported from site to site, minimising costs
- Galvanised steel grating acts as a floor above the sump
- Potentially enough space for a pump or outlet above the IBC when stationary
- No upstand lip at the front bottom of the door where your forklift could potentially damage during pull-out, when loading the container with the IBC
